Helping Build a Safer, More Prepared Community

Dear Residents,

Being prepared for an emergency can make a meaningful difference for you, your family, and your neighbors.

Our department is sharing information about the Community Safety Initiative, which brings together two important goals: 1) helping families become better prepared for and know how to respond to emergencies, and 2) building a local SafetyNet for neighbors experiencing unexpected hardship.

The Initiative features Safety Bandana-Guides, portable emergency reference tools containing practical safety information that families can keep readily available.

A portion of each participating purchase helps build the Bandana-Guide SafetyNet for the community identified by the purchaser's Safety Code. **Your Safety Code is your ZIP code.**

Visit **www.Bandana-Guide.com** to learn about the available Bandana-Guides and how the SafetyNet works.

Together, we can encourage preparedness, strengthen community connections, and help catch a neighbor when an unexpected emergency knocks them off balance.
