**Community Preparedness and Neighbors Helping Neighbors**

When an unexpected emergency occurs, preparedness and community support can make an important difference.

The Community Safety Initiative brings these two ideas together through its Safety Bandana-Guides and local Bandana-Guide SafetyNet funds.

Safety Bandana-Guides are portable emergency reference tools containing practical information on subjects ranging from first aid and personal safety to home emergencies and outdoor preparedness.

Through participating purchases, a portion of the proceeds is reserved for a local SafetyNet intended to provide limited assistance to neighbors experiencing genuine, unexpected emergencies.

Residents identify their community by entering their ZIP code as their Safety Code when purchasing.

The Initiative offers residents another opportunity to strengthen safety awareness and participate in neighbors helping neighbors.
